## **International FASD Awareness Day Zoom Movies**

Wednesday September 9, 2020

### **Moment to Moment: Teens Growing Up with FASD** by NTI Upstream

This 59-minute documentary presents the stories of four teens, their families, and one criminal justice case. It is an enlightening combination of medical/scientific information presented by experts in the field of prenatal substance/alcohol exposure and longitudinal storytelling. It clearly demonstrates the range of this disability, challenges for those who experience Fetal Alcohol Spectrum Disorders (FASD), and strategies their families/caregivers use to help them. The movie will be followed with a discussion hosted by FASD self-advocates.
